

This is a digital copy of a book that was preserved for generations on library shelves before it was carefully scanned by Google as part of a project to make the world's books discoverable online.

It has survived long enough for the copyright to expire and the book to enter the public domain. A public domain book is one that was never subject to copyright or whose legal copyright term has expired. Whether a book is in the public domain may vary country to country. Public domain books are our gateways to the past, representing a wealth of history, culture and knowledge that's often difficult to discover.

Marks, notations and other marginalia present in the original volume will appear in this file - a reminder of this book's long journey from the publisher to a library and finally to you.

Usage guidelines

Google is proud to partner with libraries to digitize public domain materials and make them widely accessible. Public domain books belong to the public and we are merely their custodians. Nevertheless, this work is expensive, so in order to keep providing this resource, we have taken steps to prevent abuse by commercial parties, including placing technical restrictions on automated querying.

We also ask that you:

- + *Make non-commercial use of the files* We designed Google Book Search for use by individuals, and we request that you use these files for personal, non-commercial purposes.
- + *Refrain from automated querying* Do not send automated queries of any sort to Google's system: If you are conducting research on machine translation, optical character recognition or other areas where access to a large amount of text is helpful, please contact us. We encourage the use of public domain materials for these purposes and may be able to help.
- + *Maintain attribution* The Google "watermark" you see on each file is essential for informing people about this project and helping them find additional materials through Google Book Search. Please do not remove it.
- + *Keep it legal* Whatever your use, remember that you are responsible for ensuring that what you are doing is legal. Do not assume that just because we believe a book is in the public domain for users in the United States, that the work is also in the public domain for users in other countries. Whether a book is still in copyright varies from country to country, and we can't offer guidance on whether any specific use of any specific book is allowed. Please do not assume that a book's appearance in Google Book Search means it can be used in any manner anywhere in the world. Copyright infringement liability can be quite severe.

About Google Book Search

Google's mission is to organize the world's information and to make it universally accessible and useful. Google Book Search helps readers discover the world's books while helping authors and publishers reach new audiences. You can search through the full text of this book on the web at <http://books.google.com/>

REPORT OF TRUSTEES.

HON. ASA S. BUSHNELL, Governor:

This hospital continues to retain its high standard of excellence in all respects, as well as in its economy of management. The operations for the current year have been uneventful, except in the distressing death of Dr. F. A. Todd, our senior assistant physician. Dr. Todd, while in the discharge of his duties, encountered a mad dog, and in his effort to prevent the animal from doing harm to patients, was himself bitten in the thumb. He went to the Pasteur Institute in Chicago for treatment, but without avail. He died within five weeks of hydrophobia, a most distressing death. The doctor was one of the ablest staff officers we have had, and we sincerely mourn his untimely taking off.

The cost of maintenance has been as follows: Total cost for current expenses and officers' salaries, \$167,514.62; average number of patients resident during year, 1,400; per capita cost, \$119.65.

Progress has been made toward increasing the comfort and amusements of our people.

On August 29 we were visited by the first fire of any moment in our history, which consumed our morgue and storage sheds, the money cost of the loss being about \$5,000. Through the kindness of the Emergency Board, a handsome brick morgue and also an ample storage shed of brick have taken the place of the wooden structures destroyed by the fire.

Contracts were let for additions to three cottages at a cost of \$6,075, which only included the construction of the new portions. The remainder of the work of remodeling these cottages and two others, has been done by persons we employed by the day, under the direction of the superintendent. Two of the cottages that have been remodeled are occupied, and the work on the other three is approaching completion. A contract was also let for the construction of a hospital building for male patients, provided for by the last appropriation act of the General Assembly, which will be completed and occupied by the 1st of next June. The additions to cottages, with the new hospital, will increase our capacity to fully 1,500 patients. The appropriations for sewage tank, engine and pumps for the completion of the sewage disposal works, have been and will be expended in time to secure a test of its utility as a fertilizer, which we are looking forward to in the expectation of realizing all we

have hoped for. We have already demonstrated with the sewage beds we have in use the entire practicability of sewage disposal.

It is again a great pleasure to us to testify to the faithfulness of the staff, the steward, the matron, the storekeeper, the supervisors, the attendants, and all of the employes, with whose loyalty, fidelity and capacity our success is due. They all have the sincere thanks of the Board.

CHARLES FOSTER, *President*,
PARKS FOSTER, *Vice-President*,
G. P. CAMPBELL, *M. D.*,

L. C. COLE,

Trustees.

SUPERINTENDENT'S REPORT.

To the Honorable Board of Trustees of the Toledo State Hospital:

GENTLEMEN: The end of another fiscal year renders it incumbent upon me to present for your consideration the superintendent's report of the operations of the institution under your control, this being the fifteenth annual report. By referring to table No. 1 it will be seen that there were 1,405 patients remaining at the end of last year, 732 men and 673 women. There have been admitted during the year, 372 patients, 207 men and 165 women, making the total number under treatment 1,777, 939 men and 838 women, of which number there were discharged recovered, 104, 63 men and 41 women, improved, 54, 26 men and 28 women, unimproved, 22, 14 men and 8 women, not insane 3, 2 men and 1 woman, died 82, 45 men and 37 women, and on September the 5th, 73 men and 53 women, making a total of 126 persons, were transferred to the Massillon State Hospital, and on the order of the Governor, 1 male patient was transferred to the Dayton State Hospital, making the total number removed from the hospital 392, 224 men and 168 women, leaving at the date of this report 1,385 patients, 715 of whom are men and 670 are women. The average number resident during the year was 1,400, 730 men, 670 women.

The percentage of recoveries, based on the total number admitted was 27.96 per cent., and the percentage of deaths based on the whole number under treatment was 4.61 per cent.

The per capita cost, based upon the funds drawn from the State Treasury, including current expenses and officers' salaries, was \$119.65. Based upon the same and including receipts from all sources, was \$129.19.

The percentage of recoveries is about the same as that of last year, but it is higher than the average rate of recoveries for former years, which is due, as stated in the last annual report, to the fact that the institution has been so overcrowded that it has been necessary to restrict admissions to the more acute and favorable cases.

The percentage of deaths is lower than ever before, which is in part due to the same cause that has increased the recovery rate. The improvements that have been made in the sanitary conditions of the buildings for patients from year to year, no doubt has contributed much to this favorable result.

It is gratifying to be able to report that the institution has been entirely free from any diseases, epidemic or contagious in character, except a few cases of erysipelas. By reference to the table showing causes of death, it will be seen that but one person has died of acute physical disease. There have been two suicides, both by drowning, and one death resulting from burns received while a patient was being bathed. While occurrences of this kind are always distressing and painful, and can usually be attributed to a lack of judgment or carelessness on the part of some one, yet it is surprising that with so large a number of insane persons cared for, the number of casualties are so few.

The year just closed is one of the most successful in the history of the institution, as is shown by the high rate of recovery, the low rate of mortality, and a lower than the average rate of maintenance, notwithstanding the advance in prices of many staple articles over former years.

The affairs of the institution have run smoothly and harmoniously, and we have been free from strife or contention, and the officers and employees, almost without exception, have manifested a commendable zeal and earnestness in the performance of their several duties.

As in former years, every privilege, liberty or pleasure has been accorded to patients that has been deemed consistent with their respective conditions, and every means at our command has been put forth to furnish useful and healthful occupation. Nor have we relaxed in our efforts to provide amusements and entertainments. Probably as often as twice a week for the entire year, our patients have been assembled on the campus or in the amusement hall for amusements and entertainments. On two occasions upwards of 400 went to the city to witness the street parades of circuses. As large a number attended the tri-State Fair and upwards of 700 took a day's outing at the Casino, a resort some 12 miles from the institution. There was not an instance of unbecoming behavior or escape, or an attempt at escape, on any of these excursions. Last winter during the sleighing season parties of patients were taken out every day that the weather would permit, for sleigh rides. A carry-all was purchased last summer, and during the pleasant weather has been used almost daily for taking patients riding.

The Legislature at their last session gave us larger appropriations for improvements and betterments than the institution has ever received since it was organized, consequently the past season has been one of great activity in this line. Five cottages have been completely remodeled, overhauled, and additions built to four of them, increasing their capacity for about 38 patients. The remodeling of these cottages has been thoroughly done. From two to three large chimneys for ventilation have been built for each one, the floors both upstairs and down have been renewed, the ceilings replastered, they have been provided with new and thorough sanitary plumbing, and in two of them, basement rooms have been converted into clothing rooms and bath rooms, giving the rooms on the first floor formerly occupied for this purpose, for other uses. Two of the cottages at this date are completed, except the interior decorations, and are occupied. Two others are almost finished and the work on the other is well under way. In the early part of the season, by using the chapel for a cottage and greatly overcrowding the wards and cottages, we were enabled to vacate two cottages at a time, which were put in order as rapidly as possible. After the removal of 126 patients to the Massillon State Hospital and re-occupying the cottages that had been vacated, we were enabled to vacate three other cottages, two of which, as before stated, are approaching completion. An addition has been built for the kitchen, 35 by 40 feet, occupying the space between the bakery and the covered way, which is used as a scullery, and a room for preparing food for the kitchen. A bake oven has been built in connection with the kitchen and two cold storage rooms have been added. The room that was used for a scullery has been converted into a room for storing flour and two small rooms, one for each the bakery and kitchen, for general stores. Each of the general dining rooms has been provided with a dish washer and a line of shafting run from the dining rooms to the kitchen, where an engine has been put in for furnishing power for the dish washers, for driving a fan in the kitchen, running a coffee grinder, meat chopper, ice cream freezer, and a three-barrel bread mixer that has been installed in the bakery. A space 30 by 75 feet has been paved with paving brick laid in cement, back of the kitchen, forming a court for the garbage wagon. A small addition has been built to the building used for shops and a 25 horse-power automatic Russell engine has been installed. A pipe cutting and threading machine that will cut up to a six-inch pipe has been added to our machine shop and a power

mortising machine added to the carpenter shop. A water heater, which automatically controls the temperature of the water, has been placed in the basement of each of the buildings for disturbed patients and a two-inch main has been carried entirely around through the duct, a distance of 2,600 feet, supplying every building with water for bath and lavatory purposes. The temperature at which these heaters will deliver water is set below scalding point, and therefore the possibility of such accidents as reported both last year and this, is precluded. The electric mains in the duct from the boiler house to the duct for the front row of buildings, on account of the duct being so crowded with pipes, frequently became grounded and we were constantly in danger of burning out the dynamos and leaving the institution in darkness, therefore a duct four by five feet, 300 feet in length, was constructed and the mains placed in it, supported on glass insulators. One thousand feet of eight-inch cast iron pipe was laid from the lakes to connect with the pumps at the boiler house, provided with suitable valves and connections to increase the supply of water to the pumps, as the six-inch main, with the increased demand for water, had become insufficient. Eight hundred feet of two-inch steam pipe was run in the duct from the boiler house to one of the buildings for disturbed patients to supply one of the water heaters spoken of. Nine thousand feet of steam pipe has been covered with non-conducting covering. A new feed water pump has been placed in the boiler house and a large amount of work done in repairs in the engineer's department. Two acres of sewage beds have been prepared, and the dike along the creek a distance of 1,500 feet has been raised 18 inches, we having found by last spring's freshets that the beds were liable to be overflowed. A tank for sewage, 40 feet in diameter and eight feet deep, with a capacity of 60,000 gallons, is just approaching completion. During the greater portion of the summer we had but about six acres of sewage beds that were available, but with this area we were able to satisfactorily take care of our sewage, although the beds were constantly overtaxed. There was but little odor about the beds and the effluent coming from them was perfectly clear and odorless. With the use of the additional beds that were added this season it is believed that the problem of sewage disposal for the institution has been satisfactorily solved. A cement walk 475 feet in length and seven feet wide has been made from the entrance to the grounds to the administration building, which supplies a long felt want and is a comfort to all persons going to and from the institution. A greenhouse, 150 feet long by 25 feet wide, of substantial construction, is just being completed for growing winter vegetables and propagating plants for the garden. During the summer and fall all the slate roofs and all the gutters and down spouts have been repaired and largely renewed, and have been repainted. This work has required a force of two tinnerns with a helper, and three painters. On the 20th of August the storage sheds and a small frame building used for a morgue, were destroyed by fire. The fire was discovered about nine o'clock in the evening and originated from spontaneous combustion in a pile of rags that were in the shed. As the sheds were filled with combustible materials the fire spread rapidly and could not be controlled until the sheds, with the building spoken of, were practically destroyed, and it was with difficulty that we kept the fire from extending to other buildings. The Emergency Board authorized us to make a deficiency of \$5,000 in the ordinary repair fund, with which to build a morgue and rebuild the sheds, and a contract for the work was let on September 24. The morgue will be of brick and there will be four rooms on the first floor, one of which will be used as a chapel, and one as a receiving room for dead bodies, where they can be dressed and prepared, in connection with which there will be a cold storage room, and two other rooms on the first floor and a room on

the second floor will be used for pathological laboratories. A new hospital building for men is being erected in the space between the extreme cottage on the front row and the building for disturbed male patients. This will be the most ornamental building on the grounds and will accommodate 75 patients and has three complete wards or departments. This building, with the enlargements that have been made to cottages this season, and the additions that will be built to cottages next year, will give the institution an increased capacity for 130 patients, bringing the total capacity up to about 1,500.

On February 17, Mr. R. E. Hamblin resigned the position of steward and was succeeded by Mr. C. S. Miller, who for four years had been the storekeeper. The position of storekeeper, made vacant by the promotion of Mr. Miller, was filled by the appointment of Mr. Ephraim M. Garrett. Dr. Fred A. Todd, my first assistant, died at the Presbyterian Hospital in Chicago, of hydrophobia, on September the 30th. On August 29, just as the doctor had started out to make his morning visits to the cottages, he met a strange dog of good size, to which he reached out his hand and snapped his finger. As he did so the dog sprang at him and caught him by the end of the thumb of the right hand, tearing off the nail and lacerating the thumb. The wound was immediately cauterized and dressed. The dog was killed a few minutes later. A post mortem examination, made by a Veterinary Surgeon, Dr. J. V. Newton, showed the dog's stomach to be filled with pebbles, sticks and straw, but no food, and the glands about the neck to be enlarged and congested. The carcass was sent to Dr. O. P. Ohlmacher, the Pathologist and Bacteriologist of the State Hospital for Epileptics at Gallipolis. Three rabbits were inoculated, all of which were taken, in from 18 to 20 days with rabies, and died. After a dog that had been bitten by the dog that bit Dr. Todd developed hydrophobia, and one of the rabbits that had been inoculated showed unmistakable symptoms of the disease, the doctor was persuaded to go to Chicago and take the Pasteur treatment, although he thought it was useless to do so, because his wound had healed so kindly, and had been so promptly and well cared for. After being in Chicago two weeks he developed hydrophobia and was taken to the Presbyterian Hospital, where after four days of terrible anguish, he died. Dr. Todd was a man of strong personal characteristics; he was brave, honorable and kind; he was warm and true in his friendships, was frank and outspoken, and never resorted to deception or subtleties. He was systematic, faithful and painstaking in the discharge of his duties, even to the smallest, and considered no duty a hardship that contributed to the welfare of his patients, or to the benefit of the institution. In his death the institution has lost a valuable officer, the patients a kind and capable physician, and his colleagues a delightful companion and true friend.

On October 17, Dr. George R. Love was elected to the position of assistant physician, made vacant by the death of Dr. Todd, and Dr. R. B. Leister was also elected assistant physician at this meeting, as an additional officer. At the date of the last annual report there was a vacancy on the staff for an assistant physician, which was filled on December 17, by the election of Dr. Ella G. Lupton to the position.

Dr. A. F. Shepherd and Dr. W. G. Cooper continue to perform their duties in the same intelligent, zealous manner that has always characterized them. To them, and to all the officers that compose the staff, I desire to express my gratitude and appreciation for their many acts of personal kindness, and for the faithful manner in which they have discharged their respective duties. Our thanks are due to Rev. A. J. Jennings, who as often as every two weeks, has conducted religious services, and to a number of other clergymen who from time to time have officiated. We are also indebted to Rev.

David H. Moore, editor of the Christian Advocate, for a very delightful and eloquent address on the Fourth of July, also to Gen. Brinkerhoff, President State Board of Charities, and to Rev. J. Wesley Hill, who made very appropriate remarks on that occasion. In this connection I wish to express my gratitude to Mr. Sol Smith Russell, who gave us a very delightful entertainment, and will be gratefully remembered for a long time by many of our patients. Our thanks are also due to the large number of publishers of newspapers and periodicals, who contribute their papers to the institution, and to a number of news stands and persons who furnish us with periodicals and reading matter.

Another year, gentlemen of the Board, places me under renewed obligations to you for the firm support, wise counsel, and friendly aid that you have at all times extended to me. Hoping that I may be able to merit your continued confidence and that the coming year may be as successful as the one just past, I remain,

Respectfully,

H. A. TOBEY,
Superintendent.
